

O Mary! My Mary!

Did I offend you! O it would
break my poor old heart for I do
so love and admire you!

(Shu Shu - I could add and feel much
concerned about the pace of your life -
but this is no time to think of that) -

You know I should have loved
the boots, and can feel the love -
warmth on my feet - but the
matter should be thrown in reverse -
I should be sending "Boots" to you.

- in fact I have been in the act of
sending this pittance to you for
books - it will buy some stamps.

This message is to tell you and
my dear friends in AAA how

Surprised and very happy I was to
know you remember poor little me
not in words only, but here are the
"boots" to PROVE it!! I went
around singing and feeling so re-
newed in spirit - better and stronger
for your love.

Deep down in my heart I
wish for you a great good year
f'74 - a year of growth and achieve-
ment toward your goal. I am

Ever your Friend!
June.

Mary dear —

Before I got this letter mailed I received the check and the unnies! I am going to accept it graciously and gratefully — with all appreciation of the proven fact that you love me and think of little me. If only my futile efforts were deserving of it!

Now I am waiting for the next dem = out of doors — to wear my unnies — surprising the warmth of these garments hugging your body.

Thank you.
Anne.

We are dreamers of a rainbow dream
That sparkles in every woodland stream,
A dream that soars like a wild white dove
To a rainbow world of infinite love.

Nov. -Dec. 1973

Here's what's happening with the Rainbow Family.

As you may know, we have sponsored gatherings of tribes, families, and solitary seekers for the past two summers in wilderness areas of Colorado and Wyoming. The love energy was so high and powerful that we were reborn again and again until we knew we had to stay together and keep this spirit alive among us, to bring it with us, and to gather together others in an ever-widening circle. So we have begun a caravan to move about this country, hopefully about the whole world one day, to extend the lines of communication between us and to learn from each other.

My
Long
Long
dream
Passion

We have taken to calling this travelling branch of the family the Rainbow Tribe, because we are nomadic, and because we value the tribal ways of earlier times when people cared for each other as well as for all of nature. We are searching for better ways to live, to halt our runaway destruction of the planet, to break down the barriers that separate us, to live healthier, more joyous, more meaningful lives in loving harmony with each other and the natural beauty of the earth.

In a Wyoming ghost town we found a 66 passenger school bus and began to convert it into comfortable living quarters with kitchen, toilet, shower, sauna, solar water heater, and an engine capable of being powered by either propane or methane. We have 3 buses ready to join us this month and many others are preparing to join us at a round-up in February, when we will be moving out from our winter quarters in the southwest to hold gatherings and fairs throughout the country.

Instead of concentrating on one national gathering, we plan several regional gatherings during the summer. We hope that anyone wishing to help with such gatherings may be able to visit us sometime this winter in the southwest where we will be pooling our insights and ideas. There we will also be developing a mobile fair, the Rainbow Tribal Eco-Spiritual Medicine Show. We will have booths devoted to information and services, booths for crafts and for entertainment, free concerts, free theatre and puppet shows, tipis for tribal councils on communities, sharing ideas and resources, where and how to start whole new communities, helping to plan food coops, free clinics, free schools, prison groups or whatever, and tipis for tribal healing, workshops on wild foods and herbal medicines, Indian sweat lodge, massage, and trance therapy, and many other healing trips.

If you have a craft or a talent or an energy, or tools or materials or a vehicle that you want to put in the service of building a new world, come and join us. We would like to have whole buses devoted to different crafts, such as printing, or photography. Some of the buses now being prepared include a library, an art studio, a child care center, a laundry, a film and theatre stage, a puppet show, a music bus, a circus bus, a methane production unit, a women's collective bus, and a mobile free clinic, and we need people who are into any of these specialties. We need musicians and mechanics, carpenters and camerapeople, farmers and physicians, we want to be a travelling community capable of creating communities wherever we go. We want to build methane converters all over the country and convert all our vehicles to methane that we ourselves produce. We want to work on solar, wind and water energy, and build a network of communities that are self-sufficient but inter-dependent. We hope to organize, perhaps in three years time, a great Alternative Life Style World's Fair, and are now seeking a suitable site.

We have had so many people, at the gatherings and in letters, tell us their dreams and offer their energies, that we know **WE CAN DO ANYTHING WE WANT!** So what is your fantasy? What kind of world do you want to live in? Write to find out where we are, and find us, and together we'll make it all happen. The rainbow is the universal symbol of hope, of love and unity among all peoples, of peace and joy, and if you have a vision of a better world, you have a rainbow vision and you are one of us.

MAY THE GREAT SPIRIT SMILE ON YOUR PATH,

THE RAINBOW TRIBE

Of course The Caravan Movement
is as yet in an embryonic stage
of development - you know my hope
is that when we become "enlightened"
we will be able to exercise our (the
peoples) sovereign power to bring
about CHANGE.

Your Anne.

Too Sad we are not in a position
NOW to bring about effective
pressure on Congress to withhold
funds from Saigon - at least to
release prisoners.
