TOKYO, April 21—Twenty-five survivors of the atomic bombings of Hiroshima and Nagasaki left here today for the United States on the first leg of a tour to speak of the horrors of atomic war.

The 25 were selected from 70 applicants from among scientists, physicians, students, newspapermen, labor union officials and wives. Many show visible scars of their experience with the bomb: scars or disfigurements. "When they were first selected, it took tremendous courage for them to appear in public," Mrs. Reynolds said. A brief statement of its members intend "to present the experience of the atomic bomb and its aftermath and to exchange ideas and information with others in an effort to help the world find ways to abolish war."

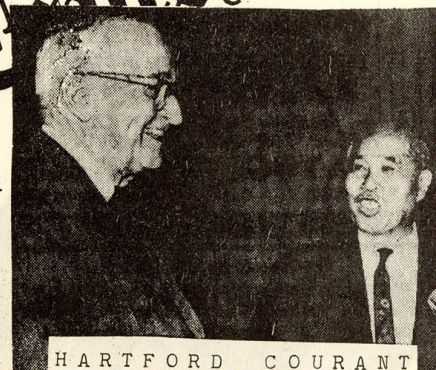

In the United States the bomb survivors expect to stay in American homes with as wide a variety of persons as possible. They will have formal and informal meetings with civic, church and fraternal groups. The mission is supported by the mayors and civic leaders of Hiroshima and Nagasaki. It lists as honorary sponsors many prominent Americans, Japanese and Europeans, including Norman Thomas, long-time peace leader.

very happy to have you take a look inside the library so you can see what this country has to offer."

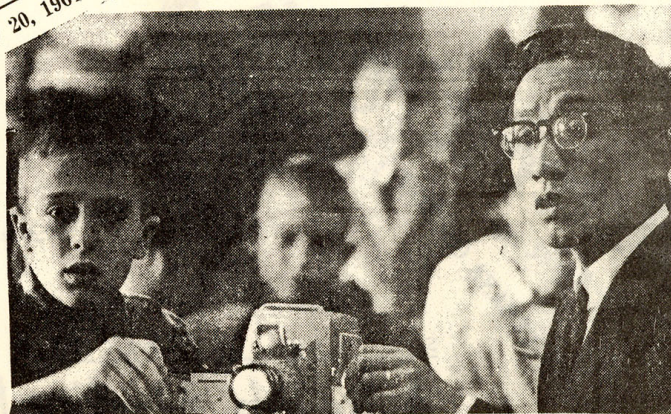

"We didn't have any business to be enemies. We had always been friends."

Was Height of Folly  
To which Matsumoto replied: "The whole war was the height of folly."

The group that visited Truman was one of three touring the world on a peace mission. This group left Japan on April 21 and will go from here to Columbia, Mo., St. Louis, Louisville, Ky., and Dayton, Ohio.
