REMEMBRANCE DAY OF 1992

**HONOR  
ROLL OF  
ARTISTS**

Japanese culture celebrates the senses and values the essential contribution artists make to communal life. In the United States, too, artists of Japanese ancestry have played an important role in defining local Nikkei communities. Through bad times and good, their creativity has moved and inspired us, and spoken for us. For most, recognition has not been commensurate with their accomplishments. And so today we honor those whose work has enriched the cultural life of New York City and its environs. We are sure there are names that have been inadvertently omitted: to those artists and their families and friends, our sincere apology.
